BABYLON

INTRODUCTION

$BBL is a deflationary token that is designed to become scarcer over time. BABYLON works differently and ensures long-term stability with success. All $BBL holders receive an 4% premium for every buy / sell transaction in Binance-linked BUSD, which is automatically sent to your wallets.

The BABYLON token is our foundational currency that enables investors to hold billions or even trillions, from it in their wallets. As for its international recognition and its licit utility, BBL will be thousands of times up and and will persistently expanding its reach.

Funded by a strategic buyback, 2% tokens are collected from every transaction and converted into BNB and stored in our contract. Then it buys BBL directly from exchanges and immediately removes the purchased tokens permanently from the circulating supply while forming green candles on the price chart. 2% of each transaction is transferred to the liquidity pool for pancakeswap in order to create a stable lower price limit.

BABYLON

ABSTRACT

Being the first cryptocurrency that rewards its users in $BUSD, Babylon Coin is a front runner among all cryptocurrencies. With its anti-Whale system, Babylon Coin discourages Whale sells by limiting any sell amount to a maximum of 0.25% of the circulating supply. Holders of Babylon Coin get rewarded in Binance Pegged USD, a first in the history of cryptocurrency. With every transaction, a small percentage of tokens are automatically transferred to the PancakeSwap Liquidity Pool.

Babylon Coin also maintains a BuyBack reserve from where the tokens are converted into Binance Coin ($BNB) and securely locked and stored in the Babylon contract. These BNB are then used for strategic BuyBack & Burn – the contract Buys Babylon Coin, creating volume, rewards, & positive price action, then sends those tokens to the Burn address – removing them permanently from circulation, including rewards eligibility. This last step means holders of $BBL continuously receive a higher overall share of rewards distributed and circulating supply reduces over time.

Babylon Ecosystem has an active NFT marketplace to buy and sell NFTS and a dApps Dashboard where you can Buy and Swap $BBL, along with tracking your BUSD rewards. Other features like Babylon Wallet, Play2Earn games, Staking Pools and Babylon Exchange are launching in 2022, providing both entertainment and utility for $BBL holders and to ensure ongoing volume, rewards and capital growth.

BABYLON

BABYLON TOKEN PROTOCOL

BABYLON TOKEN is the next evolution of a reflection token on the Binance Smart Chain (BSC): the first BUSD reflection token to maximize your earnings for now and in the future. Just hold $BBL token and you will receive 4% in BUSD for every transaction automatically delivered to your wallet. Basically, it's a secure system that keeps the details of your transactions safe within the network. A well-distributed user base and good publicity increase the value of $BBL.

4% Of every buy/sell is redistributed to all holders IN BUSD.

2% 2% Of every buy/sell is transferred into Liquidity Pool for Pancakeswap to create a stable price floor.

2% Of every transaction is used for strategic BuyBack & Burn.

1% Of every buy/sell for charity, supporting humanity and our communities live better, negotiation under going with a reputable charity organization to be in charge of managing the charity wallet.

1% Of every buy/sell spent on marketing, more marketing = more buyers, it is for the benefit of the community.

BABYLON

FEATURES

BUSD Reflections

Earn automatic Binance-linked BUSD rewards by holding your BABYLON TOKEN - 4% of every purchase and sale transaction is redistributed directly in wallets to all token holders. You will automatically receive the rewards in your wallet or request your rewards manually at any time in our dApp dashboard. This effectively means that BABYLON native reflection works in parallel with stable yield while your tokens grow exponentially.

Buy-Back Wallet

2% tokens are collected from every transaction and converted into BNB and stored in our contract. This wallet is known as the BuyBack Wallet and when activated it will buy $ BBL from exchanges and permanently remove the purchased tokens from circulation while making green candles at the same time. More than 1.7% of the tokens have already been burned through the buy-back mechanism, which will continue to increase in the future.

Liquidity Pool

Earn automatic Binance-linked BUSD rewards by holding your BABYLON TOKEN - 4% of every purchase and sale transaction is redistributed directly in wallets to all token holders. You will automatically receive the rewards in your wallet or request your rewards manually at any time in our dApp dashboard. This effectively means that BABYLON native reflection works in parallel with stable yield while your tokens grow exponentially.

Anti-Whale Mechanism

Our anti-whale function ensures that sales quantities of more than 0.25% of the total supply are not possible at once. Initially it was 0.25%, but after burning 32% of the tokens of the total supply, we reduced the limit per transaction by 32%. The anti-whale does not necessarily prevent whales from being sold, but a maximum limit serves as an indicator when a whale is trying to sell its tokens and avoids price manipulation.

DYNAMIC TAX

To protect our investors from dumping, every sell transaction is taxable according to holding period, the 10/% rate applies after 360 days and increase proportionaly as the holding period decreases. the revenue generated from this mechanism is distributed accourding to the normal taxe rate.
if you buy and sell the same day, your sell tax rate will be 28%, if you sell after one day your rate will be 27.95% and so on.

BABYLON

THE TECHNOLOGY BEHIND BABYLON

Binance Smart Chain (BSC) was created to enable the use of solidity-based smart contracts at a significantly faster and more efficient rate than other competing chains. With decentralized exchanges on BSC providing lightning-fast transactions and ultra- low costs, BSC has established itself as one of the world's leading blockchains for Decentralized Finance (DeFi). BSC makes use of BEP-20 token technology, a proprietary blockchain that ensures the security and privacy of all users and developers.

Its inherent dual-chain interoperability enables cross chain communication and scalability of high performance, decentralized applications (dApps) that lead to a quick and fluid user experience. It is EVM compatible and will support all current Ethereum tools, with faster and more affordable transactions. Based on the Proof of Stake consensus, its on-chain governance allows decentralization and substantial community participation via the use of 21 validators that verify transactions.

BABYLON

BABYLON ECOSYSTEM

Dapp & Swapexchange

With constant updates and community participation, our dApp dashboard consists of swap exchanges with a user-friendly interface and allows to view rewards generated in real-time. Our ecosystem offers endless potential, all made possible by our team who are the perfect blend of brain and muscle power to make the experience personal for every investor.

Staking Pools

By using an innovative set of smart contracts for staking pools, we are transferring some of our liquidity to our partnered tokens by buying them on certain contract interactions. The purchased tokens are then distributed among the participants in the pool. This concept gives our token its sustainable use, in which it makes economic and mathematical sense to use X tokens in order to earn Y tokens.

Nft Marketplace

Our platform allows holders to buy and sell NFTs, including anything they receive through liquidated collateral from the NFT lending platform. This opens up a uniquely competitive market for buying NFTs below their usual market value to make navigating the crypto world more intuitive and simpler. The marketplace will also include a minting tool that will allow users to create their own NFTs from images, videos, and other data.

DAO Protocol

The BBL token is used to govern all of BABYLON's current and future protocols. It enables holders to control everything. BBL holders will be able to propose changes to anything in the Babylon verse, from contract amendments, tokenomics, ecosystem, tax rats and revenue distribution.

BABYLON

VALUES

Transparency

The team behind Babylon Token consist of a group of well-known professionals in the field of finance, blockchain and marketing. The team is KYC verified , and communicate directly with the community via regularAMAs and chats on Twitter , YouTube , Telegram and Discord.

Trust

80% of new coin launches end up being scams, with a further 15% failing within their first few months. In an industry where only 5% of projects survive, it is essential that a project is trusted, and run by professionals with a proven track record in business. Babylon have published all relevant wallet addresses, including management team wallets, locked liquidity in a third party secured locker for 400 days, and communicate all major business decisions with the community. No project has done more for community trust and contract security.

Community

Babylon Token is one of the fastest growing and most active communities in cryptocurrency history. Our 100,000+ strong community continues to grow daily, supported by a team of over 30 community managers, mods and admins, and a management team who interact directly with the community daily.

Longevity

Babylon Token is here to stay! Having already established ourselves as one of the top breakout projects of 2021, 2022 holds immense opportunity for Babylonians. With the upcoming launch of a suite of exciting utilities, a strong and experienced team, and a healthy budget for marketing and development, we aim to grow into one of the world's top cryptos in 2022

BABYLON

TEAM BEHIND BABYLON

The team behind BABYLON Token consists of a group of professionals entrepreneurs in the field of finance, blockchain, and marketing, who are united to build something outstanding and remarkable. Hence, we support them by cultivating an environment that enhances their creativity and encourages growth. The team is KYC verified, and communicated directly with the community via regular AMAs and chats on Twitter, and Telegram.

Basically, it's a group of German-based crypto enthusiasts, we help our holders to find the tools they require to bring unique perspective and inspiration to their life. It's just another way to motivate folks to step outside of preconceived regulations and limits and enjoy the experiences of our decentralized movement worldwide.

BABYLON

BABYLON ROADMAP

Phase 1

- Babylon Conceptualization
- Smart Contract Development
- Website Development
- Smart Contract Audit
- Presale On Pinksale
- Pancakeswap Listing

Phase 2

- Babylon Swap Launch
- Cmc Listing
- Coingeko Listing
- Marketing

Phase 3

- NFT Marketplace
- Marketing
- Dex listing
- Influencer hiring

Phase 4

- Staking pools
- More Marketing
- Brand ambassadors

Phase 5

- Babylon DAO
- More dex listing
